5004 Brand YieldGard VT Triple

5004 is a top performing 90 day VT Triple corn hybrid. It is very versatile and works across many soil types and conditions. Good roots and very good late season stalks along with a high yields will make this hybrid a joy to harvest.

Plant Characteristics

Maturity Days	90
Black Layer GDU's	2150
Appearance	Showy hybrid with semi upright leaves
Plant Height	Medium Tall
Early Season Vigor	7

Ear Characteristics

Ear Type	Semi Flex	Husk Cover	7
Ear Placement	Medium	Retention	8
Kernels	14-18	Shank Length	Short
Test Weight	7		

9=Best 1=Worst

Agronomic Characteristics

Root Strength	7	5004 has good roots
Stalk Strength	8	5004 has good staygreen and very good late season stalks
Plant Integrity		5004 has good staygreen and very good late season stalks
Population Tolerance	9	5004 has enough flex for lower populations but performs best at populations between 25,000 to 34,000
Drought Tolerance	7	

Insect and Disease

Northern Leaf Blight	8	
Disease		5004 has good plant health, similar to 5154.
Insects		5004 is protected with YieldGard VT Rootworm and YieldGard corn borer technology.

General

Placement	5004 is a 90 day YieldGard VT Triple hybrid with average drought and good disease tolerance. It will work best on your more productive soils.
Positioning Statement	5004 is an average flowering 90 day hybrid with good northern movement. It handles stress well and has very good yield potential, equal to 5154. Good companion hybrids to 5004 are 5155, 5157, or 4564.
