## 5151 Brand YieldGard Corn Borer

5151 is a hybrid that is setting a new standard for yield in the 91 day maturity. Excellent agronomics and the ability to take stress all contributes to high yield. This is a go anywhere type hybrid that adapts well to many different environments.

### Plant Characteristics

Maturity Days	91
Black Layer GDU's	2140
Appearance	Nice plant appearance
Plant Height	Medium Tall 94
Early Season Vigor	7

### Ear Characteristics

Ear Type	Flex	Husk Cover	8	9=Best 1=Worst
Ear Placement	Medium 41	Retention	8	
Kernels	14 to 16 around red cob	Shank Length	Normal	
Test Weight	8			

### Agronomic Characteristics

Root Strength	8	Very good root strength. Very similar to 5613.
Stalk Strength	7	Good stalks. Stalk strength is equal to 5613.
Plant Integrity		Excellent. Very good late season plant health
Population Tolerance	9	5151 can tolerate a wide range of populations. The flex ear allows for lower plant populations, while very good stalks and roots can handle higher populations.
Drought Tolerance	9	

### Insect and Disease

Gray Leaf Spot	7
Disease	5151 has a solid disease tolerance package.
Insects	YieldGard corn borer protected

### General

Placement	5151 has been a consistent yielding hybrid that will work on most soil types and management styles. This hybrid has also shown excellent stress tolerance.
Positioning Statement	Place 5151 anywhere a 91 day corn borer protected hybrid is needed. There are no restrictions with this hybrid.
