5623 Brand

2008

YieldGard Corn Borer Roundup Ready Corn 2

5623 is a high performing hybrid for your more productive soils. This hybrid has corn borer protection along with added herbicide flexibility of Roundup Resistance. 5623 has a nice flex ear and will handle many population levels. Watch this hybrid work for you on your farm.

Plant Characteristics

| | |
|--------------------|--|
| Maturity Days | 96 |
| Black Layer GDU's | 2240 |
| Appearance | Medium stature good late season intactness |
| Plant Height | Medium Tall |
| Early Season Vigor | 7 |

Ear Characteristics

| | | | |
|---------------|-----------|--------------|---|
| Ear Type | Semi Flex | Retention | 8 |
| Ear Placement | Medium 40 | Shank Length | 7 |
| Kernels | 14-18 | | |
| Test Weight | 7 | | |

9=Best 1=Worst

Agronomic Characteristics

| | | |
|----------------------|---|---|
| Root Strength | 8 | 5623 has very good roots |
| Stalk Strength | 9 | 5623 has excellent stalks. |
| Plant Integrity | | 5623 has very good staygreen and very good late season intactness |
| Population Tolerance | 8 | This hybrid can handle high populations but has enough flex for lower population scenarios. |
| Drought Tolerance | 8 | |

Insect and Disease

| | |
|----------------------|--|
| Northern Leaf Blight | 8 |
| Eyespot | 7 |
| Insects | This hybrid is protected with YieldGard Corn Borer Technology. |

General

Placement 5623 is a very versatile hybrid. It handles tough drought conditions and is a top performer in the best yield environments.

Positioning Statement 5623 will work in most environments. Strong agronomic package coupled with top yields makes this a sure winner. This hybrid works best where a 96 to 100 day hybrid is the average maturity.
