## 5734 Brand YieldGard VT Triple

5734 is a high yielding race horse hybrid. This hybrid will run with the best you can throw at it. 5734 has everything you are looking in a 97 day hybrid.

### Plant Characteristics

Maturity Days	97
Black Layer GDU's	2270
Appearance	Medium stature, semi upright leaves
Plant Height	Medium
Early Season Vigor	7

### Ear Characteristics

9=Best 1=Worst

Ear Type	Semi Flex	Husk Cover	7
Ear Placement	Medium	Retention	8
Kernels	16 - 20	Shank Length	Medium
Test Weight	7		

### Agronomic Characteristics

Root Strength	7	5734 has good roots, equal to 5623
Stalk Strength	8	5734 has above average stalks, better than 5612
Plant Integrity		5734 has average staygreen, but very good plant intactness
Population Tolerance	8	This hybrid has shown very good tolerance to high populations (28 to 34000) and narrow rows but can double ear in low populations if conditions are favorable.
Drought Tolerance	7	

### Insect and Disease

Eyespot	8	Northern Leaf Blight	7
Insects	YieldGard VT Rootworm and Corn Borer protected.		

### General

Placement	5734 should be used on better managed soils where rootworm protection is needed, corn borer protection is desirable and Roundup herbicide is used.
Positioning Statement	5734 works best in high yield environments. It should be positioned as an average to early maturing hybrid due to its late flowering and fast grain fill period. This hybrid will move south better than 5612 because of its exceptional late season stalk quality.
