6053 Brand

2008

YieldGard Corn Borer Roundup Ready Corn 2

6053 is a solid 100 day hybrid. Strong yield potential and very good agronomics make this hybrid a new leader. This hybrid performs on all soil types and many different environments. Give 6053 a chance to unleash its potential on your farm.

Plant Characteristics

Maturity Days	100
Black Layer GDU's	2350
Appearance	Medium hybrid with semi upright leaves
Plant Height	Medium
Early Season Vigor	8

Ear Characteristics

Ear Type	Semi Flex	Husk Cover	7
Ear Placement	Medium	Retention	8
Kernels	16-20	Shank Length	7
Test Weight	7		

9=Best 1=Worst

Agronomic Characteristics

Root Strength	8	6053 has very good roots
Stalk Strength	7	6053 has good stalks, equal to 5613
Plant Integrity		6053 has very good in season stalks, possible late season lodging
Population Tolerance	9	6053 has a good combination of roots and stalks to make this a versatile hybrid. It can handle lower populations and will excel at higher populations of 28 to 34000.
Drought Tolerance	8	

Insect and Disease

Northern Leaf Blight	7
Eyespot	8
Disease	YieldGard corn borer protection really helps the late season health of 6053
Insects	YieldGard corn borer protected

General

Placement	6053 will work anywhere a 100 day hybrid with corn borer protection and Roundup resistance is needed. Good plant health along with very good roots and stalks lets this hybrid work in high or low population environments. This hybrid has no soil restrictions.
Positioning Statement	6053 is a high yielding, steady hybrid. It can handle lower populations and will excel at higher populations. Strong companion hybrids for 6053 are 5733, 5623, 6213, and 6463.
