## 6112 Brand

2008

### Roundup Ready Corn 2

6112 is a very healthy 101 day Roundup Ready hybrid. A strong agronomic package and excellent yield potential will let this hybrid earn a spot on your farm.

### Plant Characteristics

Maturity Days	101
Black Layer GDU's	2350
Appearance	Medium plant with semi upright leaves
Plant Height	Medium
Early Season Vigor	7

### Ear Characteristics

9=Best 1=Worst

Ear Type	Semi Flex	Husk Cover	7
Ear Placement	Medium	Retention	7
Kernels	16-18	Shank Length	Medium
Test Weight	7		

### Agronomic Characteristics

Root Strength	8	6112 has very good roots
Stalk Strength	8	6112 has very good stalks
Plant Integrity		6112 has very good staygreen and excellent late season plant health
Population Tolerance	8	6112 population tolerance is very good. Plant at 28 - 32000 to maximize yield potential.
Drought Tolerance	8	

### Insect and Disease

Northern Leaf Blight	7	
Gray Leaf Spot	6	
Eyespot	9	
Disease		6112 is a very healthy hybrid with very good stay green
Insects		6112 has average corn borer tolerance

### General

**Placement** 6112 should work across most soil types. Semi flex ear enables it to work in lower populations but yields can be maximized at populations between 28 to 32000.

**Positioning Statement** 6112 is a strong 101 day Roundup Ready hybrid. It will work across most soil types and different populations. With the semi flex ear, populations should be at the upper end of what is normally planted on your farm.
