6217 Brand

2008

YieldGard Plus Roundup Ready Corn 2

6217 is a solid hybrid with strong east to west movement. This hybrid performs best as a short to average maturing hybrid in any area. 6217 has shown to work across many soil types and moisture conditions. 6217 would make an excellent choice for a 100 to 102 day hybrid with YieldGard corn borer protection and Roundup Ready Technology.

Plant Characteristics

Maturity Days	102
Black Layer GDU's	2360
Appearance	Very Attractive
Plant Height	Tall 100
Early Season Vigor	7

Ear Characteristics

9=Best 1=Worst

Ear Type	Semi Flex	Husk Cover	8
Ear Placement	Medium	Retention	8
Kernels	16-18	Shank Length	7
Test Weight	7		

Agronomic Characteristics

Root Strength	8	6217 has excellent summer roots. Could see some late season leaning.
Stalk Strength	8	6217 has very good stalk quality
Plant Integrity		6217 has very good late season plant intactness
Population Tolerance	8	6217 has enough root and stalk strength to excel at higher populations, yet, has enough ear flex to handle low population and higher yield environments.
Drought Tolerance	7	

Insect and Disease

Gray Leaf Spot	7
Northern Leaf Blight	7

Insects 6217 contains both the YieldGard Corn Borer and YieldGard Rootworm Technology

General

Placement 6217 should be placed where corn borer and rootworm protection is desirable and Roundup Ready Technology is needed.

Positioning Statement 6217 has very strong drought tolerance with good ear flex. It can handle high or low populations and has shown strong yields across many environments.
