6443 Brand

2008

YieldGard Corn Borer Roundup Ready Corn 2

6443 is an exceptional 104 day hybrid with YieldGard Corn Borer protection and Roundup Herbicide flexibility. Its agronomic package allows this hybrid to work across all populations. Exceptional drought tolerance and high yield potential will let this hybrid work in the best and worst conditions.

Plant Characteristics

Maturity Days	104
Black Layer GDU's	2460
Appearance	Tall, very healthy
Plant Height	Tall 100"
Early Season Vigor	7

Ear Characteristics

Ear Type	Flex
Ear Placement	Medium-High 42"
Kernels	16-18
Test Weight	7

Husk Cover	8
Retention	8
Shank Length	7

9=Best 1=Worst

Agronomic Characteristics

Root Strength	7	6443 has average roots.
Stalk Strength	7	Late season stalks are very good.
Plant Integrity		6443 has very good late season staygreen and plant integrity
Population Tolerance	9	Flex ear and very strong stalks and roots let this hybrid excel in high and low population settings.
Drought Tolerance	8	

Insect and Disease

Gray Leaf Spot	7	Northern Leaf Blight	7
Disease	6443 has an above average disease package.		
Insects	YieldGard Corn Borer Technology		

General

Placement	6443 will work where a 104 day hybrid is needed. Corn borer protection and Roundup herbicide resistance make this hybrid a fit about anywhere. This hybrid will handle the toughest of environments and excel in the best environments.
Positioning Statement	6443 will be at home across Northern Nebraska, Northern Iowa, South Dakota, Colorado, and Minnesota.
