6663 Brand

2008

YieldGard Corn Borer Roundup Ready Corn 2

6663 is an exceptional hybrid that raises the bar for other 106 day hybrids on the market today. Excellent stalks and roots enables 6663 to take high populations in stride while the strong ear flex and drought tolerance will let it move into stress environments. 6663 is sure to make an impact on your farm.

Plant Characteristics

Maturity Days	106
Black Layer GDU's	2508
Appearance	Medium, attractive plant
Plant Height	Medium
Early Season Vigor	8

Ear Characteristics

Ear Type	Flex	Husk Cover	7
Ear Placement	Low	Retention	8
Kernels	16-18	Shank Length	7
Test Weight	7		

9=Best 1=Worst

Agronomic Characteristics

Root Strength	8	Excellent roots, likely will be the last one standing.
Stalk Strength	8	Excellent stalks, enhanced by lower ear placement and shorter plant height.
Plant Integrity		6663 has excellent late season plant integrity.
Population Tolerance	8	6663 can easily handle populations of 27 to 30000 plants but has enough flex and drought tolerance for lower populations
Drought Tolerance	8	

Insect and Disease

Gray Leaf Spot	8	Northern Leaf Blight	5
Eyespot	7		
Disease	6663 is a very healthy plant. It handles all common diseases very well including Common Rust		
Insects	YieldGard Corn Borer Protected		

General

Placement	6663 is a solid 106 day hybrid with excellent stalks and roots. Tremendous yield potential and solid agronomic package will allow 6663 to work across most environments. This hybrid is an excellent choice where corn borer protection is desirable and Roundup Ready Technology is needed.
Positioning Statement	6663 is an excellent choice for reduced tillage or any other conditions where emergence may be slowed due to cool spring conditions. 6663 will maximize yields at high populations without sacrificing stalk strength.
