6941 Brand

2008

YieldGard Corn Borer

6941 is a solid corn belt hybrid. Strong flex ear with deep kernels, solid agronomics, and lots of flexibility will let this hybrid earn a spot on your farm. 6941 can go anywhere high yields and corn borer protection is desirable.

Plant Characteristics

Maturity Days	109
Black Layer GDU's	2550
Appearance	Dark green, medium stature attractive plant
Plant Height	Medium
Early Season Vigor	8

Ear Characteristics

9=Best 1=Worst

Ear Type	Flex	Husk Cover	7
Ear Placement	Medium Low	Retention	8
Kernels	16-18	Shank Length	7
Test Weight	8		

Agronomic Characteristics

Root Strength	7	6941 has very good roots.
Stalk Strength	8	6941 has very good stalks and very low possibility of green snap.
Plant Integrity		Excellent late season plant health and intactness.
Population Tolerance	9	6941 has solid stalks and a good root that will let it handle populations of 26 - 30000 plants. It has enough flex to handle lower populations as well.
Drought Tolerance	8	

Insect and Disease

Gray Leaf Spot	7	Northern Leaf Blight	7
Eyespot	6		
Disease	6941 has a strong disease package.		
Insects	YieldGard Corn Borer Protected		

General

Placement 6941 has very strong east to west movement. This hybrid works across most environments and management styles. 6941 works great in reduced or conventional tillage scenarios and across most soil types.

Positioning Statement Use 6941 wherever a strong 108 - 109 day hybrid is needed. Very strong roots and exceptional stalks with low green snap potential along with a strong agronomic package make this a "go anywhere" hybrid.
