6942 Brand

2008

Roundup Ready Corn 2

6942 is a solid corn belt hybrid. Strong flex ear with deep kernels, solid agronomics, and lots of flexibility will let this hybrid earn a spot on your farm. 6942 can go anywhere Roundup Ready protection is desirable.

Plant Characteristics

Maturity Days	109
Black Layer GDU's	2550
Appearance	Dark green, medium stature attractive plant
Plant Height	Medium
Early Season Vigor	8

Ear Characteristics

9=Best 1=Worst

Ear Type	Flex	Husk Cover	7
Ear Placement	Medium Low	Retention	8
Kernels	16-18	Shank Length	7
Test Weight	8		

Agronomic Characteristics

Root Strength		6942 has very good roots.
Stalk Strength	8	6942 has very good stalks and very low possibility of green snap.
Plant Integrity		Excellent late season plant health and intactness
Population Tolerance	9	6942 has solid stalks and a good root that will let it handle populations of 26 - 30000 plants. It has enough flex to handle lower populations as well.
Drought Tolerance	8	

Insect and Disease

Northern Leaf Blight	7
Gray Leaf Spot	7
Eyespot	6
Disease	6942 has a very good disease package
Insects	Above average corn borer tolerance

General

Placement 6942 has very strong east to west movement. This hybrid works across most environments and management styles. 6942 works great in reduced or conventional tillage scenarios and across most soil types.

Positioning Statement Use 6942 wherever a strong 108 - 109 day hybrid with Roundup flexibility is needed. Very strong roots and exceptional stalks with low green snap potential along with a strong agronomic package make this a "go anywhere" hybrid.
