HF346BMR Brand

2008

Plant Characteristics

Days to Mid Bloom	85 days to bloom
Grain Color Planted	White
Standability	8 - Very good
Plant Height	85 inches
Panicle Type	Grain type
Midrib Type	Brown Mid Rib
Harvested Grain Tannin	White w/o Tannin
Harvest Mode	Silage
Aproximate Seeds/lb.	15,000 to 16,000
Pounds/Ac. in Row Dryland	5 to 8 lbs. per acre
Pounds/Ac. Broadcast Dryland	Not recommended
Pounds/Ac. in Row Irrigated	8 to 12 lbs. per acre
Pounds/Ac. Broadcast Irrigated	Not recommended

General

General Comments	<i>This hybrid forage sorghum is a Brown Mid rib that has a very sweet stem with excellent green leaf retention. This hybrid has excellent foliar disease resistance and maintains a healthy canopy until harvest.</i>
Characteristics	<i>HF 346 BMR is designed for a one time harvest but has good regrowth capacity which can be utilized for direct grazing after the silage crop has been removed, if the growing conditions allow.</i> <i>The brown mid rib characteristic increases digestibility of the stem fibers by reducing the quantity of indigestible lignin.</i>
Overview	<i>This hybrid forage sorghum is a Brown Mid rib that has a very sweet stem with excellent green leaf retention. This hybrid has excellent foliar disease resistance and maintains a healthy canopy until harvest.</i>
